Panel description

Player's name sticker box

Every remote attach with a set of player's name sticker, it can be stick on corresponding places.
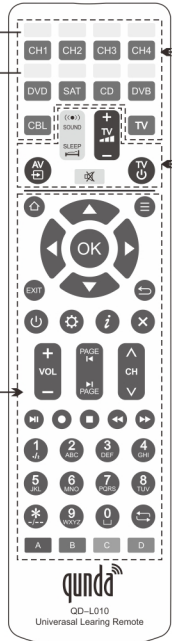

Player switch buttons (with light)

"CH1-CH4,DVD,SAT,CD, DVB,CBL" is used for switch different players, and at the same time, it can switch corresponding control page. After the switch, you can change the channel with the remote control. "TV" button is switch button for controlling TV. All above 10 buttons has a built-in LED light, it can clearly prompt its control page.

Learnable buttons

Learnable buttons are in dotted line box, and it has 40 buttons.(If adding 7 button on the TV page, it will has 47 buttons in total.)
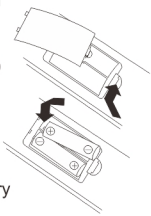

These 7 buttons are convenient to control TV.

They can only be learned in "TV" page, but they are valid in any page.
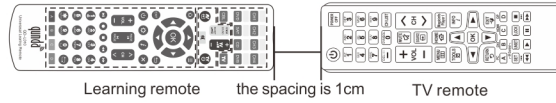

Battery installation

1. Open the battery cover, input the batteries according to the positive and negative poles shown in the box.
2. After inputting batteries, press any button and one of 10 buttons will be blinking, which shows the battery installation is correct, otherwise, you need to check the battery power and polarity.
3. Don't mix-use the old battery and new battery. You'd better not use 1.2V chargeable battery.
4. if it is not used for a long time, please take out the battery to avoid the leakage liquid damage.
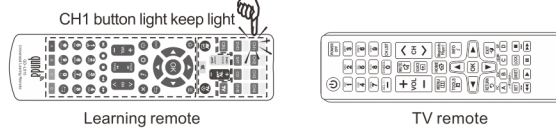

Learning steps

**1. Suppose CH1 player is TV, we can make TV remote learned on CH1 page.**

(1) Make the front end of TV remote aim at the front end of this learning remote, and the spacing is 1cm.
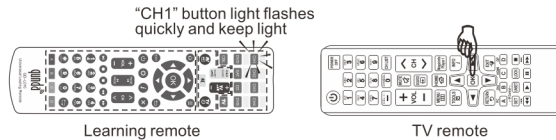

Learning remote   the spacing is 1cm   TV remote

(2) Press and hold buttons "EXIT" and "CH1" simultaneously. After 3 seconds, "CH1" button light will change from slight light to bright light and keep light, then you should release buttons. Now this remote has entered into the learning status of CH1 page.

(7) After finishing "CH1" page learning, you can test whether this learning remote can control your TV, and check whether all the function buttons are learned successfully. If some buttons can not work normally, you just need to enter into the learning status of "CH1" page, learning the abnormal buttons again.

2. CH2-CH4, DVD, SAT, CD, DVB, CBL page learning

This 8 pages can be learned according to the remotes of different players, and the learning way is the same with "CH1" page. For example, after entering into "CH2" page learning, press "EXIT" and "CH2" until "CH2" button light changes from slight light to bright light and keep light. And so on, for learning way of other pages.
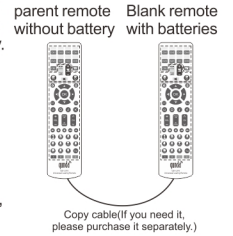

3. TV page

7 buttons like " TV ", " TV +/TV —"... can only learn on "TV" page. Learning way: Press and hold "EXIT" and "TV" buttons simultaneously until "TV" button light changes from slight light to bright light and keep light. Besides 7 buttons on "TV" page, 40 buttons in the below still can be learned. Attention: 7 buttons like " TV ", " TV +/TV —"... are valid in any control page and no need to switch to TV page, which can make you control TV easily and conveniently.

4. Copy function between pages

Suppose the remotes of "CH2" player and "CH1" player is completely the same, you just need to make "CH1" page learning contents copied into "CH2" page. Operation way: press and hold "CH1" and " (power) " buttons until "CH1" button light changes from slight light to bright light, then release buttons. Press "CH2" button again and release quickly, the button light will flash continuously. Copy is finished when the button light goes out.

5. Copy function between remotes

When the first remote has learned the control code of all access devices, you can use the copy function to make the first remote(parent remote) copied into the blank remote. Attention: 10 pages participate the copy. Make the parent remote without battery and put batteries into blank remote, and use the cable to connect the parent remote and blank remote. Pressing "5" and "OK" buttons on the blank remote, some button lights will change from slight light to keep light. Release these two buttons, and press "OK" button again, the indicator light will flash and start to copy. The indicator light will go out after finishing the copy, then disconnect.
